# Cynthia's Trinket Tray

Plan for Web Dev Spring 25

### Cynthia's Trinket Tray

A blog that takes the form of a virtual trinket tray: I can write about all my hobbies, likes, dislikes, and review my newest trinkets. Using the home screen as a bag with many items inside, I will make each item clickable and link to it's own webpage. The site will have images and doodles, and have a girly, childish vibe.
